Deadline for manuscript  
submissions:

**closed (31 August 2022)**

### Message from the Guest Editors

In the last few decades, significant developments have been made to improve the structural performance of existing buildings against different hazards (earthquakes, volcanoes, landslides, floods, wind, blasts) using traditional and innovative strengthening/retrofitting systems. The sustainability of such systems needs to be tackled in many challenging aspects, such as material compatibility, reversibility and durability of the intervention, reduction of cost, time, and greenhouse gas (GHG) emissions, and energy optimization.

This Special Issue focuses on advanced strengthening/retrofitting techniques, even integrated with solutions for energy saving or for the reduction of environmental impacts, and on recent developments in experimental and numerical investigation methods for strengthened/retrofitted constructions, with reference to masonry, reinforced concrete, and timber structures. Original research articles and literature reviews are welcome. Research areas may include (but are not limited to) the following issues:

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
