Message from the Guest Editors

There is a global tendency towards the utilisation of waste produced from the food processing industry. Food by-products are rich in antioxidants and bioactive compounds. Hence valorisation of these by-products into cost-effective nutritional food materials is desirable considering the environmental and economic benefits, as well as emerging consumer values.

This Special Issue invites researchers in the relevant field to submit original research and systematic reviews to expand knowledge in the field of food by-product utilisation, product fortification, and sustainable product design. We are seeking submissions on sustainable product development and optimisation, valorisation, and by-product utilisation, as well as consumer attitudes and behaviour towards the new sustainable trend and food choices. Researchers in interdisciplinary areas such as food science, gastronomy, nutrition, business, and marketing are invited to contribute to the growing body of knowledge in the area of food sustainability and consumer behaviour.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
