Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editors

Consumers recognize the current environmental problems and have started to pay attention to the natural origin of ingredients, nutritional value, and food safety. Sustainable development is a conception that is in the interest of modern consumers as it contributes to quality of life at the level of the current development of civilization. Traditional methods of food production may be unfavorable for the environment; therefore, it is important to control the most important stages of food production in order to use food production waste as raw materials.

There are scientific publications that describe the results of research on products obtained in accordance with the concept of sustainable agri-food production, but the range of possible solutions, both at the stage of product design and the technology used during their production, provides a wide field for research.

There is a need to update the knowledge on new trends in agri-food production in the context of sustainable development.

We invite you to publish original, high-quality scientific articles on sustainable development in food production and the broadly understood agri-food production.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
