Message from the Guest Editors

Recently, there has been growing interest in the application of sustainability issues in supply chain management, logistics, transportation and various optimization models (Seuring and Müller 2008). Supply chain management constantly faces many challenges and one of them is to operate in a sustainable manner. In this Special Issue, our aim is to explore the application of sustainability in supply chain management, operation management, logistics, transportation, healthcare management and fuzzy sets theory. We invite researchers from various fields of management to consider original and high-quality research papers that report mainly on sustainability-management-related issues that would contribute to fulfilling the aim of this Special Issue. Manuscripts in this Special Issue will focus on both theoretical and empirical studies.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
