### Message from the Guest Editors

Dear Colleagues,

The rise of the circular economy and the sharing economy during the past decade has led to a resurgence of interest in product-service systems (PSSs) that create value by integrating a physical product and a service. PSSs are now being heralded as one of the most effective instruments for the transition to a circular economy. There are high expectations for PSSs, in terms of their potential to enable simultaneous environmental and economic benefits. However, in practical terms, many companies have struggled to implement PSSs that achieve the expected environmental and economic benefits. Furthermore, there are few evaluations of PSS performance in practice. Inter- and transdisciplinary approaches, and frameworks that consider the broader systems influencing the uptake of PSSs, such as socio-technical systems or social practices, can help to identify the reasons for their success or failure, including design, consumer practices, and institutional factors. This special issue is focussed on solving such challenges by examining real-life PSSs, their performance, and factors influencing their uptake and implementation.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
