# **Sustainable Smart Cities and Societies Using Emerging Technologies**

Guest Editors:

Dr. Ashutosh Sharma

Prof. Dr. Gennady E. Veselov

Dr. Alexey Tselykh

Prof. Dr. Byung-Gyu Kim

Deadline for manuscript submissions:

30 June 2024

## **Message from the Guest Editors**

Sustainable Smart Cities and Artificial Intelligence offer an intensive evaluation of how sustainable Smart City establishments are made at different scales through automated means of thinking, for instance, geospatial information, data examination, data portrayal, clever related things, and quick natural frameworks handiness. Progress in electronic thinking brings us closer to making a consistently reproducable model of human-made and trademark from structures. urban regions and transportation establishments to utility frameworks. This continuous living model empowers us to manage and improve these working structures, making them dynamically observant. Smart Cities and Artificial Intelligence providea a multidisciplinary procedure, using speculative and applied pieces of information, for the evaluation of Smart City applications.
