### Message from the Guest Editor

The scope of this Special Issue in *Sustainability* is twofold: on the one side, it aims to provide a systematic review of practices and models in the current background of building design and urban planning; on the other side, it is intended to illustrate, discuss, and detect the major challenges in the adoption of sustainable practices and community-based models in the urban regeneration of our cities.

An inter-scalar, multidisciplinary approach is welcome, as buildings and open spaces have to be considered as a whole when it comes to urban sustainable regeneration.
