Message from the Guest Editors

Although the original goal of wastewater treatment plants (WWTPs) was to remove pollutants from human and industrial effluents to protect both human health and ecosystems, new challenges are under consideration today, oriented at assuring the sustainability of WWTPs in terms of both reducing their environmental impact and integrating them into the urban circular economy.

To achieve these future goals, not only the development of new technologies and processes is necessary, but also a paradigm shift in wastewater management. In this sense, separation of different domestic wastewater streams and decentralization of wastewater treatment are recognized as the most promising concepts to promote local recycling and reuse of resources contained in domestic wastewater.

This Special Issue of *Sustainability* aims to report the latest developments in sustainable wastewater management and treatment. For this reason, we invite authors to contribute original research articles as well as review articles that will show the recent advances in this field.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
