Deadline for manuscript  
submissions:  
**closed (1 July 2023)**

### Message from the Guest Editors

Dear Colleagues,

Sustainable building technologies, such as near-zero energy buildings, have received increasing attention in recent years, due to their advantages in reducing the energy consumption of buildings, as well as carbon emissions. In the sustainable building technology system, the performance of the building envelope not only determines the energy-saving effect of the building, to a large extent, but also has an important impact on the indoor environment.

This Special Issue aims to collect papers on the research of thermal and daylight environments of sustainable buildings. An in-depth discussion of the issues will encourage all researchers to contribute improved original papers and high-quality review articles about, but not limited to, the following:

- Heat and moisture transfer process of the wall and its impact on the indoor thermal environment;
- Thermal and daylight performance for PV windows or other window systems;
- Thermal performance for infrared reflective/emissive layer or transparent materials;
- Shading, daylighting and lighting design;

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
