Message from the Guest Editors

Some potential examples of topics in Special Issue are as follows:

- The analysis of dimensions such as social and environmental vulnerability, urban resilience, mental health, violence and crime, from a psychosocial perspective;
- Psychological barriers that limit climate action;
- Theoretical and methodological contributions from environmental psychology;
- The relationship between security, well-being, and social cohesion with the presence of natural resources as an integral part of urban space, and its relationship with adaptation to climate change and disaster risk;
- The exploration of climate resilience factors that have a key role in helping cities to adapt to climate change
- Reciprocal relationships between people and their natural and built-up environment, with its social, economic, cultural, and environmental concomitances;
- The impact of noise, traffic, and population density, and how this affects social cognition, emotions, and behavior.
