### Message from the Guest Editors

Dear Colleagues,

The growth in tourism activities is associated with economic, environmental, and social costs which undermine the sustainability of the tourist destination.

On the one hand, growth of tourism supports creation of jobs and value additions as direct effects, and the positive externalities as indirect outcomes. On the other hand, there are negative externalities that need to be managed. The negative externalities induced by the transport of tourists will become one of the greatest challenges for remote island countries in the shadow of the Paris climate agreement. The adverse effects not only disrupt the environment, but also cultural and social landscapes.

This Special Issue of *Sustainability* invites research papers to discuss and analyze specific problems of sustainability in light of tourism, economic growth, and development. Authors of research papers focusing on tourism and sustainability can conduct investigations using approaches like theoretical constructs and models, econometric analysis, comparative studies, environmental mitigation strategies, environmental compensation measures, and case studies.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
