Message from the Guest Editor

Dear Colleagues,

For more than four decades, the paradigm established by Garrett Hardin's 1968 essay "The Tragedy of the Commons" has influenced how we think about a wide range of social and ecological challenges, including human population growth, the destruction of wilderness and consequent loss of biodiversity, and the changing state of the earth's oceans, atmosphere, and climate. Hardin's metaphor of the fragile commons has even influenced our thought about phenomena that were still nascent in 1968, such as the evolution of the "digital commons" or Internet. As the half-century mark for "The Tragedy of the Commons" approaches, these essays will consider whether Hardin's metaphor remains useful for understanding our current social and ecological challenges, or whether these problems, and their possible solutions, now transcend the parameters set by this seminal essay.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
