Message from the Guest Editors

In recent years, UAVs in various forms and sizes and with a variety of capabilities have emerged, and UAV technology has proven itself viable and applicable in diverse areas such as defense, search and rescue, agriculture, manufacturing, environmental surveillance, healthcare, and infrastructure inspection.

In particular, as fostered by sustainability, applications of UAVs have great environmental and social impacts on our lives. UAVs are lightweight, low-cost, and require less energy compared with ground vehicles, making UAV units the key in various business models for a low-carbon future.

This Special Issue encourages high-quality research applying experimental, conceptual, and methodological approaches, along with literature reviews.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
