### Message from the Guest Editors

In order to understand how urban and regional planning can benefit from geospatial big data with the main aim to reach the SDGS objectives, this Special Issue is dedicated to the exploration of:

- conceptual approaches and application experiences;
- theoretical and methodological development;
- techniques (i.e. machine-learning, data analytics, data visualization and data models for the representation of geospatial big data, Data-informed design and planning, urban modelling, E-participation);
- integrated application of BIM and GIS;
- geographic knowledge bases;
- scientifically grounded indicators.
