### Message from the Guest Editors

This research topic aims to present and discuss methods and effects of promoting sustainability in landscape ecosystems, to explore the interactions between natural ecological systems and socio-ecological systems, and to explore the patterns of social and emotional processes that promote landscape sustainability. This topic aims to provide new ways to study the sustainability of landscape ecosystems in the context of climate change.

Potential topics include, but are not limited to:

1. Methods and principles of landscape ecological restoration;
2. Application of new technologies for sustainability of landscape ecosystems;
3. Composition and critical mechanisms of natural ecological systems and socio-ecological systems in the landscape;
4. Interaction of natural ecological systems and socio-ecological systems in the landscape;
5. The relationship between sustainability of landscape ecosystems and human well-being.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
