Resallience, University of Lyon, 69007 Lyon, France

Deadline for manuscript submissions:
closed (30 January 2024)

Message from the Guest Editors

Dear Colleagues,

In this Special Issue, original research articles and reviews are welcome that deal with urban parameters and geographical factors likely to impact the climatic signal in cities; techniques and tools to apprehend these phenomena such as in situ or remote sensing measurements; the most appropriate spatial and temporal scales; climatic evolutions specific to urban environments and their adaptations, their modelling, and the transition to the operational phases and their concrete translation in urban planning and requalification. This list is far from being exhaustive and the articles may focus on a wide range of the following applications:

- Urban overheating and thermal comfort;
- Impacts on health;
- Urban climate and biodiversity;
- Climate change and the urban environment;
- Management of climate extremes in the city;
- Adaptation and mitigation of thermal extremes;
- Climate measurements in the urban environment;
- Urban climate modeling;
- Surface urban heat island and remote sensing.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
