Message from the Guest Editors

Dear Colleagues,

Urban social space refers to the projection of urban residents' economic and social activities in space or the relationship with urban space. With the development of globalization, the social spaces of big cities worldwide are becoming increasingly fragmented, divided and polarized, which has seriously affected the state of urban sustainable development.

This Special Issue focuses on urban social space and sustainable development. Research areas may include (but are not limited to) the following:

- Transformation and restructuring of urban social space;
- Spatial distribution of urban population and sustainable development;
- Migration and the evolution of urban internal space;
- Study on the evolution of urban spatial structure and sustainability;
- The characteristics and development mechanism of urban residents' activity spaces;
- Living spatial structure of urban residents;
- Research on the social composition of urban community residents and urban integration;
- The relationship between urban social space and urban planning.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
