Message from the Guest Editors

Dear Colleagues,

Both the urban and rural developments need to cope with social, demographic, economic, governance, and environmental challenges. Cities are growing very quickly and the world's population are expected to be highly concentrated in urban areas, while the rural areas suffer from rural population and economy decline in the near future. It is obvious to see that the sustainability of our planet is in greater danger than ever before.

The purpose of this Special Issue is to gather innovative research contributions aiming to achieve sustainable urban and rural development by applying relevant theories and modelling approaches. Contents may consider but not limited to analyzing the spatio-temporal characteristics of our urban and rural dynamics, revealing the factors that drive these changes, and projecting the future urban and rural futures.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
