Message from the Guest Editors

Dear Colleagues,

The proposed Special Issue focuses on the role of ventilation and air distribution to improve indoor air quality, control pollutants, and infectious agents, and satisfy thermal comfort needs for built environments both above ground and underground. Ventilation technologies can be natural, mechanical, or hybrid. Built environments can be human-occupied, industrial, or agricultural functional. This Special Issue will present developments of highly efficient ventilation and air distribution technologies for different scenarios.

Deadline for manuscript submissions:

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
