### Message from the Guest Editor

Dear Colleagues,

Wetlands are natural assets that humanity must preserve in order to secure sustainable water resources and maximize ecological value. We need to consider the ecological services that wetlands provide to us at a time when various problems caused by urbanization are constantly becoming an issue with the growing number of people and extensive property damage caused by climate change.

Therefore, in this Special Issue, we will deal with the ecological solutions and ecological services of these wetlands. The nature-based solution of wetlands includes the scope of the function of wetlands, such as reducing environmental pollutants generated from the watershed, urban water circulation, and securing urban ecosystem diversity.

This Special Issue will focus on the ecological services of wetlands that have been relatively less well-covered in the existing wetland research. In addition, we will focus on research content that broadly interprets the ecological and environmental functions of wetlands linked with urban water circulation technology that can be connected to wetlands.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
