Special Issue

Sustainability in Aquaculture Systems

Message from the Guest Editor

Aquaculture is the fastest growing protein sector in the world. Fish are often excellent converters of feed; as poikilotherms, they do not need to maintain a particular body temperature and as they are supported by water, they can focus energy on adding protein with minimal skeletal support needed. The aim of this Special Issue is to document and encourage advances in sustainability of aquaculture and aquatic systems. Specific areas of interest include improvements in sustainability in aguatic nutrition, engineered systems, plant-based aguaculture, waste management technologies, and sustainability-focused value-added systems. Systems within which these advancements may occur include ponds, cages, recirculating aquaculture systems (RASs), efficient raceways and other systems such as aguaponics that can be sustainable in environmental. economic and socially relevant areas. Given that aquaculture is growing fast, it is critical that positive solutions to sustainability challenges are developed and disseminated.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
