Sustainable Development Goals: A Pragmatic Approach

Message from the Guest Editors

The trend of Sustainable Development Goals (SDGs) is strongly growing. Our task is to show how our work can cover the gaps in the literature and provide answers to current problems. These challenges must be met by starting with young people. It is up to them to build our confidence, so universities are called upon to provide the necessary tools to create a winning mix between new generations, public administration, and business. The concept we want to express in this Special Issue is to counteract non-doing, that is, those choices that do not lead to improving current situations. At the same time, we are aware that, sometimes, ideological approaches only look at specific aspects of sustainability without considering its three dimensions. Sustainable choices aim at stakeholder involvement, maintaining a balance of ecosystems. In this context, this Special Issue goes against sustainable washing practices. There are many challenges to overcome and all countries, developed and undeveloped, can contribute. In addition, the interdisciplinary approach needed to solve complex problems must be considered.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
