

## Special Issue

# Sustainable and Optimal Manufacturing

### Message from the Guest Editors

This Special Issue invites opinions, arguments, discourses, individual technologies and integrated technologies that seek to discover and optimize sustainable manufacturing technologies. There are various technological and social viewpoints on the manufacturing industry, and accordingly, the viewpoints on sustainability and optimization also change. From the perspective of sustainability and optimization, this Special Issue welcomes the submission of papers addressing topics including, but not limited to:

- Manufacturing process technology;
- Manufacturing raw material technology;
- Manufacturing industry supports and policies;
- Manufacturing data processing;
- Manufacturing workforce training.

We feel the need to look at detailed topics that may have been dealt with in a fragmented form from a more generalized and integrated perspective. Sustainability and efficiency throughout the whole manufacturing process, including material, process, assembly, distribution, and recycling, are taking on increasing significance. In this context, this Special Issue is open to both technical and discursive contributions on manufacturing technologies.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
