Special Issue

Management of Sustainable Development with a Focus on Critical Infrastructure and Diverse Environmental Studies

Message from the Guest Editor

Critical infrastructure, such as water, electricity, and das supply systems, plays a strategic role in any development program, local or global. Designing, constructing, running and managing Cls with the goal of global sustainable development is indeed a complex a complicated issue. Raw material resources and depletion is a real concern for global critical infrastructure development programs. The proper operation of the critical infrastructure (CIs) requires resources constantly, and the priority is to provide residents with services, in accordance with the law. A holistic approach to the problem includes the comprehensive management of the CI in the context of Man, technical systems, and the environment, as well as safety and health. In this Special Issue, theoretical, methodological, and practical studies, as well as reviews related to the discourse on global sustainable development and global critical infrastructure development programs in different sectors are invited to contribute. Research areas are not limited to mentioned issues. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
