# Al in Action: Advancing Infrastructure Inspection, Monitoring, and Management for Sustainable and Resilient Performance

# Message from the Guest Editors

In this Special Issue of Sustainability, entitled "Al in Action: Advancing Infrastructure Inspection, Monitoring, and Management for Sustainable and Resilient Performance", we explore the latest advancements and applications of artificial intelligence (AI) in the realm of civil infrastructure systems. As the demand for efficient. resilient, and eco-friendly infrastructure continues to grow, Al-driven innovations are playing increasingly crucial roles in revolutionizing the ways we maintain, operate, and monitor our built environment. This Issue delves into various topics related to the management, monitoring, and inspection of civil infrastructure systems. These topics include leveraging Al-driven decision making, data analytics, and predictive modeling to improve resource management, enhance safety and reliability, and promote more efficient use of infrastructure assets across different sectors. Contributors should discuss the application of Al in diverse aspects of civil infrastructure systems, such as structural health monitoring, automated defect detection, and predictive maintenance for assets like bridges, tunnels, pipelines, and roads.

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

### **Author Benefits**

# Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
