

## Special Issue

# Sustainable Materials: Recycled Materials Toward Smart Future

### Message from the Guest Editors

Environmental impacts and resultant climate change have resulted in an ever-growing requirement of sustainable solutions in all aspects, including materials used in the built environment. The articles will highlight the cutting-edge research on the recyclability of complex polymeric composites and reusability of construction materials, which have the ability to shape a sustainable future. The goal of the special issue is to ensure continuous progress in the field of recycled material systems and encourage industrial adaptation in various fields. The primary areas of interest include but are not limited to:

- Recyclability of polymeric materials
- Recyclability of natural fiber reinforced polymer composites
- Recyclability of construction materials
- Recyclability of lignocellulosic materials and composites
- Enhanced performance of recycled material systems
- Dimensional stability and structural efficiency of recycled natural fiber composites
- Life Cycle Assessment of recycled natural fiber reinforced material systems
- New advancements in recycling different material systems in the built environment

---

### Guest Editors

Dr. Avishek Chanda

Composite Materials and Engineering Center, Department of Civil and Environmental Engineering, Washington State University, Pullman, WA 99164, USA

Dr. Swagata Dutta

Rashbrook Fire Laboratory, Institute of Infrastructure and Environment, School of Engineering, University of Edinburgh, Room 1.5, John Muir Building, Colin Maclaurin Road, King's Buildings, Edinburgh EH9 3DW, Scotland, UK

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
