

## Special Issue

# Sustainable Research on Food Science and Food Technology

### Message from the Guest Editor

The aim of Special Issue is to explore new methods in food technology and food research which permit the sustainability of the food system. New methods need to valorize all the resources from raw materials, industry practices, provide low pollution packaging and food transportation options, and reduce wastes from retailers by calibrating all the parameters used in food preservation to obtain functional foods or innovative foods. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- Antioxidant substances extracted from fruit and vegetable wastes;
- Biodegradable film as active packaging;
- Microencapsulation methods for new foods;
- Barrier-enhanced or active packaging materials;
- Natural sources of pigment;
- Agricultural practice to reduce food wastes.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
