

Special Issue

Sustainable Approaches to Indoor Air Quality Monitoring and Management

Message from the Guest Editors

We are pleased to invite you to submit a research paper to this Special Issue dedicated to "Sustainable Approaches to Indoor Air Quality Monitoring and Management". Submissions covering the most promising approaches and ideas in indoor air quality (IAQ), sustainable and resilient built environment, occupant health and safety, and other relevant areas are invited. This Special Issue aims to highlight the latest advancements in IAQ monitoring and management, focusing on fostering a sustainable, resilient, and healthy built environment. As concerns about air quality grow due to urbanization and climate change, innovative approaches are essential for ensuring that indoor spaces remain safe and healthy. This issue brings together cutting-edge research and practices that address IAQ challenges, emphasizing sustainable technologies, resilient systems, and holistic strategies contributing to better air quality and overall well-being. By exploring new tools, methodologies, and policies, this collection seeks to advance the field and support the creation of environments that promote long-term health and sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
