

## Special Issue

# Digital Transformation and Sustainable Development of Tourism

### Message from the Guest Editors

The tourism sector has potential for the development of new products and related services. In many countries, tourism is an important source of income, and guaranteeing the sustainability of cultural or natural wealth, on which tourism generally focuses, requires articulating the work of academia to ensure its sustainability and permanence over time. This Special Issue aims to investigate technology in tourism, the tourist experience, generations and technology in tourism, technologies applied to sustainable tourism, tourism governance challenges, cultural heritage, technologies applied to culture promotion, and information systems and technologies. The objective is to reflect and disseminate knowledge and experiences related to innovation and technology, culture, sustainability and governance. This Special Issue unites the work of tourism experts, researchers, academics and professionals at international, national, and regional levels.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
