

Special Issue

Entrepreneurship and Open Innovation from the Perspective of Sustainable Business Models

Message from the Guest Editors

In an era marked by environmental challenges and resource scarcity, it is essential to explore how sustainable business models can be driven by and contribute to entrepreneurship and open innovation. Sustainability has positive externality. Therefore, open innovation plays a crucial role; it encourages organizations to collaborate with external stakeholders such as customers, suppliers, research institutes, and NGOs to foster sustainable practices and address environmental challenges. By involving diverse perspectives and expertise, it can promote the co-creation and diffusion of sustainable solutions and technologies. This Special Issue brings together cutting-edge contributions from researchers, practitioners, policymakers, and industry experts to explore the theoretical foundations, empirical evidence, and practical implications of entrepreneurship and open innovation in the context of sustainability. Potential topics include, but are not limited to, the following: Sustainable entrepreneurship, Open innovation, Circular economy and business models, Social and inclusive entrepreneurship, Technological advancements, Sustainable finance, Policy and institutional frameworks

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
