

## Special Issue

# Geographic Information Science and Society: Opportunities and Challenges Towards Social Sustainability

### Message from the Guest Editors

Sustainability has been defined and pursued in many ways. Social sustainability is an emerging theme, which focuses on equity, diversity and quality of life. GIScience provides both theoretical and methodological advantages to support social sustainability studies. This Special Issue aims at sharing current GIS research addressing various social sustainability issues (e.g., social equity, social cohesion, social diversity, quality of life), the analysis and/or visualization methods, and the theoretical/conceptual frameworks in the context of social sustainability. This Special Issue is intended to be cross-disciplinary and invites researchers in geography, planning, sociology, business, public policy, transportation, logistics, and other relevant fields to contribute.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
