

Special Issue

Earth Abundant Transition Metals in Chemical Sensors and Actuators

Message from the Guest Editors

This Special Issue aims to showcase the recent developments in the field of photo-, thermo-, and electrochemical sensors and actuators with earth-abundant metal complexes and materials. Original research articles, short communications, and reviews covering all different aspects of synthesis of complexes and materials with first-row transition metals, photocatalysis, electrocatalysis, photo- and electroactivated chemical processes, mechanistic studies, photoactivated magnetic molecules, and thermoresponsive magnetic molecules are invited. Manuscripts submitted for this Special Issue are subject to a peer review procedure, with the aim of fast and widespread dissemination. The topics covered in the Special Issue include but are not limited to:

- Synthesis (e.g., organic, inorganic)
- Materials (e.g., nanoparticles, carbon-based, thin films)
- Catalysis (homogeneous and heterogeneous)
- Sensors (magnetic, thermal, and electrochemical)
- Applications (e.g., small molecule conversion, coupling reactions, oxidation, and reduction reactions, displays, memories, artificial muscles).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
