

Special Issue

Sustainable Environmental Reclamation: Landscape Planning and Design

Message from the Guest Editors

It is a pleasure to invite you to contribute to this Special Issue addressing Sustainable Environmental Reclamation: Landscape Planning and Design. The state-of-the-art in reclamation has grown and evolved from surface mine origins, to address landscape transformations of dysfunctional environments to more useful settings in a sustainable manner. This Special Issue features research across this spectrum in the social, natural, and engineering sciences and the planning and design arts. Articles that describe reclamation research on surface mines, brownfields, greyfields, and other disturbed conditions, such as from landscape catastrophes are encouraged. Case studies concerning actual projects are also welcomed. This Special Issue in this open access journal is an excellent opportunity to feature one's scholarship, reaching many corners of the world. For further reading, please visit the [Special Issue Website](#).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
