

Special Issue

Sustainable Energy Systems and Applications

Message from the Guest Editors

During recent decades, the worldwide objective of sustainability has become increasingly urgent, mainly due to climate change, resource scarcity, and environmental degradation. Among the critical areas under study, the energy sector stands out as a significant contributor to these challenges. However, it can also be a central solution to achieve sustainability goals. In fact, sustainable energy systems offer a pathway towards mitigating climate change, reducing dependence on finite non-renewable resources, and enhancing socio-economic development. This Special Issue aims to involve researchers, experts, and policymakers to disseminate their latest research findings, innovative solutions, and best practices related to sustainable energy systems and applications.

Research areas may include (but are not limited to) the following: -Renewable energy technologies, hybrid systems, and their integration;-Energy efficiency;-Energy access and equity;-Sustainable urban energy planning;-Policy, governance, and regulatory frameworks;-Interdisciplinary perspectives on energy sustainability.

Guest Editors

Dr. Ana Fernández-Guillamón

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
