

Special Issue

Maritime Spatial Planning for Sustainable Fisheries

Message from the Guest Editor

The aim of this Special Issue is to assemble a set of science-based papers reporting how the maritime spatial planning process, in all its aspects, could enhance fisheries' sustainability. Priority will be given to papers that include novel tools and approaches that will be useful to facilitate maritime spatial planning for the fishery sector. Papers are invited from all countries and could describe specific case studies that can contribute to better understand how to move forward in maritime spatial planning for sustainable fisheries.

Guest Editor

Dr. Luca Bolognini

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
