Mitigate Hunger through Enhancing Plant Resistance to Biotic and Abiotic Stresses

Message from the Guest Editors

Crop production is suffering due to stress conditions, and food security is becoming a major global concern. Plants are constantly subjected to a wide variety of environmental challenges due to their sessile behavior. Environmental stresses such as drought, heat, salt, or cold may have a detrimental effect on plant development and productivity in the field. Additionally, plants endure the danger of infection by pathogens (including bacteria, fungus, viruses, and nematodes) and invasion by herbivore pests under natural conditions.

Plant responses are very complicated when many stressors occur at the same time since the responses to the combined stresses are regulated mainly by separate and often conflicting signaling pathways that may interact and inhibit each other.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
