Special Issue

Geoheritage and Sustainable Development of Geotourism

Message from the Guest Editor

Geoheritage refers to geological features, sites, and landscapes of significant scientific, educational, aesthetic, or cultural value. It represents the Earth's natural heritage and provides a window into the planet's geological history. The concept of sustainable development in the context of geotourism involves the responsible and balanced use of geoheritage resources to foster economic growth, while conserving and preserving the natural environment for future generations. Geotourism, as a form of sustainable tourism, focuses on promoting and experiencing the geological wonders of a region. It involves activities such as visiting geological sites, participating in educational programs, and engaging in outdoor recreational pursuits. By combining the principles of sustainable development with geotourism, it becomes possible to create a harmonious relationship between tourism. conservation, and local communities.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
