Special Issue

World under Pandemic—the Sustainable Economy Challenge

Message from the Guest Editor

The COVID-19 pandemic we are currently experiencing globally has led to the introduction of unusual constraints on the economy and on society, with governments around the world taking extreme special measures and introducing unusual constraints on their population in an attempt to curb the disease's spread but also, at the same time, to protect the economy. This situation is completely unique and as such serves as an opening for a new, wide field of research. The main question behind this field is what kind of measures should be taken to ensure sustainable development for the economy but also for society. In this Special Issue, we address this question to economists, sociologists, sociophysicists, econophysicists, and other scientists who would like to present their points of view.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
