

## Special Issue

# Power Electronics for Transportation Electrification: Toward Sustainable Mobility

### Message from the Guest Editors

Power electronics has emerged as an enabling technology in the deployment of next-generation sustainable systems including transportation systems, motor drives, robotics, biomedical applications, renewable energies, smart grids and data centers. The sustainable transportation segment of power electronics requires novel power conversion systems to meet stringent requirements in terms of cost, weight, volume, power quality and reliability. Moreover, to realize the advantages of high-frequency WBG power electronics in transportation electrification in practice, research and development activities in different areas need to be carried out to specifically address the open-end design problems. Some of the critical areas are (a) innovative power converter topologies, (b) novel design approach for high-frequency magnetics design with minimized parasitics, (c) high-density electromagnetic interference (EMI) filter design methodologies, (d) magnetic coil design and optimization for wireless power transfer, (e) performance evaluation of WBG devices in high-temperature (>200°C) power conversion and (f) high-performance time-optimal control schemes for power converters.

### Guest Editors

Prof. Dr. Ayan Mallik

Power Electronics and Control Engineering Laboratory, The Polytechnic School (TPS), Arizona State University, Tempe, AZ 85281, USA

Dr. Arun sankar

High Voltage Systems Engineer, Mercedes-Benz Research and Development North America, 12120 Telegraph Road, Redford, MI 48239, USA

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
