

## Special Issue

# Project Management, Supply Chain Management and Optimization in Civil & Industrial Engineering

### Message from the Guest Editors

The globe is currently experiencing phenomenal and drastic changes in all aspects of human lives. These changes have led to the initiation and implementation of a number of projects in various fields, making the role of project management more prominent and important in increasing the success of these projects. Moreover, designing an effective and efficient supply chain is becoming more important to smoothly deliver goods and services to end users. On the other hand, governments and organizations pay more attention to the environment and global warming. However, the industry and construction sectors play the most important role in environmental pollution, which has caused more attention in reducing pollution caused by industrial operations and construction activities. These pillars of sustainability can be effectively managed through multi-criteria modeling and optimization. This Special Issue of Sustainability seeks to collect state-of-the-art research works and studies in the fields of project management and green and sustainable supply chain management, as well as novel multi-attribute or multi-objective optimization methods applied in industrial and civil engineering.

### Guest Editors

Dr. Mohammad Khalilzadeh

Department of Industrial Engineering, Science and Research Branch,  
Islamic Azad University, Tehran, Iran

Prof. Dr. Jurgita Antucheviciene

Department of Construction Management and Real Estate, Vilnius  
Gediminas Technical University, LT-10223 Vilnius, Lithuania

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario  
Institute of Technology, Oshawa, ON L1G 0C5, Canada

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
