

Special Issue

Sustainable Transportation Systems in Urban Areas: Planning, Operation, and Management

Message from the Guest Editors

In the 2030 Agenda for Sustainable Development, sustainable transport is mainstreamed across several SDGs and targets, especially those related to affordability, infrastructures, cities and human settlements, as well as improving urban air quality and health, climate actions, and the reduction of greenhouse gas emissions. The emissions coming from the transport system are projected to grow substantially in the years to come, hence the ever-growing need of sustainable transportation systems to achieve better integration of the economy and urban–rural linkages while respecting the environment. This Special Issue is focused on the sustainable design, operation, and management of urban transportation.

- Sustainable mobility to meet the 2030 Agenda for Sustainable Development;
- Micro-mobility: demand, planning, management, and safety;
- Vulnerable road users;
- Crash severity prediction analyses;
- Accessibility and walkability;
- Public transport and shared mobility;
- Methodologies for diagnosis of existing urban infrastructures;
- Risk-based road safety management;
- Machine learning applications;
- Automated vehicles.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
