

Special Issue

Building a Healthy Marine Environment: A Conservation Biology Perspective

Message from the Guest Editor

The marine environment faces increasing challenges due to anthropogenic pressures, climate change, and biodiversity loss. Conservation biology plays a pivotal role in mitigating these impacts and fostering resilience in marine ecosystems. The aim of this Special Issue is to highlight cutting-edge research and reviews that align with the journal's mission to promote sustainable practices and ecological stewardship. Contributions that explore innovative methodologies, technologies, and policy frameworks are particularly encouraged. This collection aspires to bridge gaps between scientific discovery, policy implementation, and public engagement, fostering actionable insights for marine sustainability. Suggested themes include, but are not limited to:

- Marine biodiversity conservation and ecosystem services.

- The impact of climate change on marine ecosystems.
- Sustainable fisheries and aquaculture practices.
- Restoration ecology in marine and coastal systems.
- The role of technology and citizen science in marine conservation.
- Socioeconomic and cultural dimensions of marine sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
