# Urban Sustainability: Safety and Maintenance in Future Transportation Infrastructure

### Message from the Guest Editors

Transport infrastructures such as roads, and railways, commonly referred to as distributed linear assets, are critical to the survival and normal functioning of modern society. The majority of these infrastructures were conceptualized, designed and built by public sectors or government agencies without any in-depth analysis of the future needs of society and subsequent maintenance requirements, triggered by aging or accelerated aging by increased use or demand on services. The situation is further aggravated by climate change, bringing additional pressures on these infrastructures, associated with resource and budgetary constraints for maintenance.

Here in this Special Issue (SI), we aim to deliver methodologies, technologies, and tools for effective and efficient just-in-time decisions for the safety and maintenance of infrastructure. This SI is also aiming to investigate these capabilities through a set of real-world on-site demonstrators, assessing the condition of the infrastructure using advanced data acquisition methods using multiple data sources.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
