

Special Issue

Research on Environmental Microbiology and Waste Management in Environmental Protection

Message from the Guest Editor

Microorganisms play many important roles in the environment. This special issue will describe the various applications of microorganisms in the management of municipal waste and the various roles of microorganisms in sewage and soil treatment, energy production and food contamination. In the special issue also contained papers examine some recent advances in microbiological waste management. Another important aspect that will concern the special issue is the impact of microorganisms on the environment and human health, taking into account drug resistance of environmental microorganisms.

The purpose of the special issue is to collect manuscripts describing the latest achievements in the field of waste management and the role of microorganisms in its processing. In addition, articles on the current threats from microorganisms to both humans and the environment are dedicated to this issue. A special issue prepared in such a way will allow to supplement the literature with a lot of new content and create a platform for the exchange of experiences between scientists dealing with environmental protection.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
