

Special Issue

The Engineered Wood Products Industry: Sustainable Production, Management, Simulation and Analysis

Message from the Guest Editors

This Special Issue of *Sustainability* aims to disseminate relevant and original research on the sustainable production, fabrication, management, simulation, and applications of these biomaterials. Systematic reviews, critical reviews, meta-analysis reviews, numerical simulations, methods, and original research articles are all welcome (see the Instructions for Authors).

Submissions to this Special Issue on the Engineered Wood Products Industry could include (but are not limited to) the following topics: - Particle-, strand-, laminate-, and fiber-based panels and beams produced in cleaner engineered processes from any lignocellulosic-based materials based on renewable sources; - Sustainable manufacturing, processes, assessments, solutions, and propositions directly related to engineered wood products and biodegradable engineered wood products; - Composites based on wood, bamboo, and other easily renewable bioresources (and their residues); - Solid wood impregnated with resins to reach better stability and performance; - Wood resins and wood gluing processes focused on more sustainable features and performances.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
