Special Issue

The Effect of Urbanization on Climate Extremes

Message from the Guest Editors

The influence of urbanization on changes in extreme events has gained increased focus, as knowledge of this is critically important for designing suitable adaptation techniques, avoiding adverse future consequences, and enabling environment sustainability and economic growth.

The aim of this Special Issue is to present work related to the effects of urbanization on climate extremes. We welcome scientists working in geography, meteorology, climatology, hydrology, environment, ecology, economy, and sociology to contribute original research articles and reviews dealing with this issue. Contributions can include but are not limited to the spatiotemporal analysis of urban climate extremes; long-term trends of urban climate extremes; the detection and attribution of urbanization effects on local, regional, and global climate extremes; methods for the attribution of extreme events; urban heat island mitigation; future urban extreme risks; ways to mitigate the effects of urbanization on extreme events.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
