

## Special Issue

# Agriculture and Climate Change: Strategies for Sustainable Development

### Message from the Guest Editors

Global warming, mainly due to human activities, has severely affected agricultural productivity, particularly in Africa, where growth rates have fallen by one-third since 1961. Challenges include reduced crop quality, harvest instability, rising food prices, and threats to food security, with implications for national security in centralized governance systems. Regionally, rice production in Asia may decline by over 15% between 2040 and 2069, while mid-latitudes may see reduced wheat yields due to higher temperatures. Western Australia could face crop losses from decreased winter rainfall, whereas northern Europe might benefit from longer growing seasons. To tackle these issues, strategies such as climate-smart agriculture, crop variety improvement, and efficient water management are vital, requiring collaboration among stakeholders. This Special Issue encourages scholars to explore sustainable development strategies by examining stakeholder responses to climate change in agriculture.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
