

Special Issue

Sustainable Water Quality Management in the Changing Environment

Message from the Guest Editor

This Special Issue will cover a wide spectrum of topics related to water quality, including:

- Understanding eutrophication and harmful algal blooms in waterways;
- Quantifying the potential impacts of climate and land use change on hydrology and water quality;
- Applying the variable source area hydrology concept to improve water quality;
- Investigating the role of climate and watershed characteristics to better understand water quality and stream integrity;
- Examining the potential of best management practices to ameliorate water quality deterioration due to climate change and anthropogenic activities;
- The fate and transport of bacteria (coli and fecal coliforms) in agricultural and urban environments;
- Quantifying the potential impacts of climate extremes (e.g., drought and flooding) on water quality in river basins.

Key Words

harmful algal blooms
eutrophication
climate change
variable source area hydrology
best management practices
stream integrity
non-point source pollution
drought
flooding

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
