

Special Issue

Smart Infrastructure Management and Sustainable Urban Development

Message from the Guest Editor

This Special Issue of *Sustainability*, titled “Smart Infrastructure Management and Sustainable Urban Development”, invites papers focusing on research that advances the safety, health, and overall quality of life for urban populations via sustainable, resilient, and intelligent built environments and urban development. As many cities are confronted with a myriad of challenges stemming from aging infrastructure, urban infrastructure often fails to meet present demands and is projected to struggle to meet future needs, which result from climate change, the adoption of new energy sources, and the emergence of new technologies. However, integrating smart technologies into infrastructure holds promise for the streamlining of operation and management, thus enhancing its performance in order to better serve society. Given this, we encourage submissions covering a broad spectrum of topics, including but not limited to ICT-based smart infrastructure monitoring and management, the construction of sustainable and resilient infrastructure, and urban development approaches that prioritize urban residents’ safety, health, and quality of life.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
