

Special Issue

Academic Entrepreneurship in the Post-COVID Era and Sustainable Development

Message from the Guest Editors

The scope and purpose of this Special Issue is the study of academic entrepreneurship and its determining factors and consequences.

- How is technology transfer taking place in universities, and what paths is it most commonly taking?
- What are the factors that condition or determine the choice of one path or another and that condition or determine its success? In particular, the personal, institutional, organizational, and political factors that lead to choosing one or another means of technology transfer need to be studied, as does the influence of the education received in such choice.
- What consequences does academic entrepreneurship have for universities, for the region where the university is located, for the professional and personal career of the academic, and for sustainability? Specifically, what are the contributions to economic and social development as well as employment of activities connected with the third mission of universities?

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
